

ENVIRONMENTAL SUSTAINABILITY POLICY STATEMENT

Trehy Ingold Neate understands how development planning goes hand in hand with environmental responsibility while recognising the commercial realities of each project.

Not only do we see our role as advisers to our clients, we also see ourselves as guardians of the environment and every effort is taken to uphold our moral responsibility offering our clients suitable environmentally sustainable solutions.

With over 30 years experience in land development, Trehy Ingold Neate has forged sound planning strategies for our clients. The members of our planning department are well versed and informed on current environmental legislation, regulations and requirements ensuring compliance with local Councils and authorities.

We require our staff to consider the following principles of ecologically sustainable development when carrying out duties:

- ❖ Minimise the impact of our activities on the environment and work towards environmental best practice.
- ❖ Take precautionary measures to avoid, where practicable, serious or irreversible damage to the environment and assess the consequences.
- ❖ Conserve environmental criteria on all purchases.
- ❖ Consider environmental impact in use and disposal of energy, materials, waste and water.
- ❖ Recycle non-renewable resources and, where possible, use renewable resources.
- ❖ Prevent pollution on the environment.
- ❖ Ensure that the health, diversity and productivity of the environment are maintained and enhanced for the benefit of future generations.
- ❖ Develop environmentally sustainable strategies that will foster sustainability values and principles in staff and clients.
- ❖ Ensure compliance with relevant environmental sustainability legislation standards and agreements.
- ❖ Commit to continuous improvement of environmental sustainability.
- ❖ Identify likely harmful effects of development proposals on the environment.

The success of Trehy Ingold Neate's Environmental Sustainability Policy depends upon the commitment of every employee to the importance of protecting and sustaining the environment
